

NOTES:

1. Environmental conditions or possible attractants present at the time of sighting, such as food spills, water sources, or clutter that might harbor pests. This can help identify factors contributing to the pest presence.
2. If possible, including photos of the pest, the specific location, and any damage or conditions that might have attracted the pest. We recommend you to store folder in a cloud drive and share the link into this sheet.
3. You may have other relevant information needed in your pest sightings log - please amend accordingly to your needs and your requirements.
4. For more information about Malaysian Pest Control - visit <https://msianpestcontrol.com> or email to help@msianpestcontrol.com
